

Tracking Wild Wolves Kit Telemetry Data

The ongoing wolf location data at www.wolf.org have been removed because, now that wolf management has been returned to each state, wolves will be subject to regulated public taking during certain seasons, and USGS researchers would like to minimize chances of their radio-collared wolves being killed.

This information is only for use in an educational setting in conjunction with the Tracking Wild Wolves Kit. Written consent from Dr. David L. Mech and/or the International Wolf Center is required for use outside of an educational setting.

In this document, you will find telemetry data for wolves from the Moose Lake, Pike Lake, Birch Lake and Farm Lake packs. This data corresponds to activities in the Tracking Wild Wolves Kit. Each sheet represents a collared wolf from a specific pack.

Field Name	Type of field	Description of field content
WOLF	Number	The number of the collared wolf
DATE	Date	The date of the telemetry reading
TIME	Time	The time of the telemetry reading
TOF	Text	Type Of Fix: a = aerial; v = visual; g = ground
T.N.	Number	Township number North (located on the left or right edge of the Superior National Forest map)
R.W.	Number	Range West (located on the top or bottom edge of the SNF map)
S.E.	Number & text	Section Number in surveyed township with associated quadrant (1-36, guide located in legend of the SNF map; quadrants identified by NE, NW, SE or SW)
DSCRIP	Text	Description of the location
ACT	Text	Activity: r = resting; s = sleeping; t = traveling; f = feeding
ASOC	Number	Associates, other collared wolves located in the same pack
TS	Number	Total number of wolves seen
CBM	Text	Could Be More? Speculation about the existence of more wolves unseen; Y = Yes; N = No

Please visit www.wolf.org for more information about tracking wild wolves such as:

- ♦ What is radio telemetry
- ♦ Background information on the U.S. Geological Survey Project
- ♦ Background information on collared wolves
- ♦ A case study on wolf 381

Wolf 801 of the Moose Lake Pack
