

STEM Careers

Student worksheet

Name: _____

Date: _____

Directions: Read the [Women in STEM!](#) blog post. Then answer the questions below.

1. Which of the scientists and engineers interested you most? Why?
2. Follow the biography link for the scientist you chose. Read the short biography and write 3 facts that you think are interesting about the scientist's life.
3. Follow the career link provided for the scientist you chose. (If there is more than one career listed, choose one.) In the career's *Skills and Characteristics* section, you will see a list of skills and characteristics that often describe someone who enjoys that career. Choose six of these and write them in the table below. Think about how each skill or characteristic does or does not describe you. Then fill out the rest of the table based on your self-assessment.

Skills and Characteristics	This describes me...		
	Perfectly	Sort of	Not at all

4. Finish reading all parts of the career profile. Do you think this is a career you would enjoy? Explain why or why not.
