Junkbot Student Worksheet Name _____

1. What materials did you choose to build your robot? Why did you choose those materials?

2. Did you robot work on the first try? If not, what did you have to change?

3. If you build another robot in the future, what would you do differently? Why?

4. Observe your robot in relation to other groups' robots. Can you draw any conclusions about how floppy robots move compared to those with stiffer bodies?
